-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

This office action is in response to amendments and remarks filed on October 9, 2007. Original application contained Claims 1-15. Applicant currently amended Claims 1-5. The amendment filed have been entered and made of record. Therefore, presently claims 1-18 are pending for consideration.

Response to Arguments

Applicant's arguments filed on October 9, 2007 regarding rejection under 35 U.S.C. 102(e) have been fully considered and this rejection has been withdrawn.

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969). A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-18 of instant application 10/70,407 (hereafter '407) are rejected on the ground of nonstatutory double patenting over claims 1-10 of U. S. Patent No. 6,647,422 (hereafter '422) since the claims, if allowed, would improperly extend the "right to exclude" already granted in the patent.

Claims 1-18 of instant application '407 are rejected under the judicially created doctrine of obviousness-double patenting as being unpatentable over claims 1-10 of '422. Although the conflicting claims are not identical, they are not patentably distinct from each other because in view of the obviousness type double patenting rationale enunciated in **Georgia-Pacific Corp. v. United States Gypsum Co.**, 195 F.3d 1322, 1326, 52 USPQ2d 1590, 1593 (Fed. Cir. 1999), both application claim subject matter that relates to computer network security that selectively allows acceptable computer transmissions to pass through it and disallows other non-acceptable computer transmissions (i.e. acting as firewalls), and the instant application's '407 above mentioned claims merely define a multi-homed modular web server (i.e. provide the access to Web server users of multiple distinct independent servers and provide additional capabilities while each server is independently configurable in order to turn different capabilities on or off or to modify operation of those servers), using multiple network addresses on a single network interface, where a virtual host (servers) assumes the identity of one of multiple, independently-configurable homes, which is a obvious variation of web server nodes delineating one network segment from another network segment and providing security and built-in animation capabilities services of the invention as claimed in patent '422.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
